(54) DETERGENT COMPOSITION

(57)Abstract:

PURPOSE: To obtain a tablet by using a matrix of compacted particles whose sizes and shapes are relatively uniform, that is, compacted particles whose particle diameter range is narrow and whose particle shapes are relatively restricted and uniform.

CONSTITUTION: This tablet is a tablet made by compacting a granular detergent composition containing a detergent active compound, a builder, and other detergent ingredients. The tablet or its discrete region consists essentially of a matrix of particles substantially all of which have a particle size within the range of 200 to 2,000 μ m, with the difference between the upper limit thereof and the lower limits thereof being not more than 700 μ m.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
